

Name _____ Date _____

Read the paragraph below. Write the main idea under the correct label and then three details where asked.

Creating a flower garden can be fun and a lot of work. First you have to dig up the dirt where you want to plant flowers, making sure there are no branches, trash, or other objects in the way. Next you have to dig holes where the flowers or seeds will grow. Then you get to go to the store and pick out the plants or seeds you want in the garden. At last you plant the plants or seeds in the holes, cover them, and add a little water. Hopefully, with the right care, your plants will grow and be beautiful.
